Research Assistants

Prof. Salil Kanhere in UNSW

HANS WANG

Software Engineer

SKILLS (EXPERIENCED IN)

EDUCATION

Bachelor of
Computer Science &
Engineering in
Xiamen University,
China

Jul 2005-Jul 2009

- 4years overall GPA 81+
- 1st Class Scholarship Reward
- Chairman of student union

Master of
Information
Technology in UNSW,
Australia

Jul 2009-Jul 2011

- GPA Average 80+ (Distinction)
- Major in Artificial Intelligence & Network
- Solo trader as independent Programmer

Past Project (Part I)

1. Worked on **NodeJs** request + cheerio + jade for geo-location logging book & web page info scrapping
2. Worked on **Drupal** (content management framework) to build customized site with customized theme and functionalities.
3. Worked on **ThinkPHP framework 3.2**. Thoroughly studied it structure and design techniques. Utilized its routing schema to build a RESTful api.
4. Build web-based **JQMobi mobile application**, and successfully migrate it into android app using **phonegap**.
5. **Built up personal websites on AWS instance**, experienced with AWS bundle services such as EBS, S3, Rounter53 and DNS. Configured own nginx server with Drupal site, Blog site and Photo Album.

Thoroughly studied Wordpress template system, deeply understood Bootstrap Template and Drupal plugin module schema.

Setup Google Analytics tracking for my site, and Google Adsense publishing account.

HANS WANG

Software Engineer

Past Project (Part II)

6. Worked on a self-project called **Facebook Graph**, using Facebook API to extensively explore friends' connectivity graph.
7. Familiar with **Python** module structure also **pip** package control tool. Commercial experience using Python as data mining tools.
8. Familiar with **Perl scripting**, helped educational agency worked on courses data scripting.
9. Worked on **Adaptive Video streaming** Project in final semester of Master Degree, and earned HD grades. It modified the open source code of VLC player under linux system. By using C++, it certified the target concept of auto adjusting video quality based on wireless bandwidth transmission rate. And for demonstrating accurate result data, a model using shell scripts and gnuplot was built to analog the data graph.
10. Extensively used **GIT** as CI procedure, **VIM** fan. Linux fan.
11. Familiar with the **Function-oriented language**, have practiced certain amount of programing in Scala, Objective-C, and Haskell.
12. Worked on an **Online Coupon System** for a commercial digital sales website as part time job during Master Degree. It used MsSQL+JSP+Ajax, contains admin panel, frontend, and database handling.
